9.	The reported sincle-engine aircraft and biplanes were parked at the field. (N 52/A 57). Alerts were frequently practiced by the unit in the mornin hours. On such occasions the differential theorem and kill who were quartered outside the field hurs.	50X1-HUM
	ried there with their barrane.	50X1-HUN
	17 September 1940	
10.	About 60 northbound sin lo-entine low-wing monoplanes in roups of eight to ten planes—flew over the airfield about 5 p.m. Planes of the same type which were stationed in SCHODNLARDE later took off in roups of two. They made formations of from five to ten planes and practiced air fights with the first mentioned aircraft. It was observed that each plane had four cannons in the win s, the two cannons in the left win below set farther apart than those in the right win.	
	rich were assigned to the same u it as the planes (more than winty) at the STAARLE airfield.	50X1-HUM

SECRET-CONTAGL/US GRETCIALS OF Y

50X1-HUM

Comment:

50X1-HUM

It is concluded that the SCHOETAALEE airfield was occupied by a ground attack regiment. This regiment had arrived fro COTTRUS after the bomber training regiment previously station din SCHOEMALDE had been transferred to STAAKEN. The statement that the ground attack rethient is assigned to the same unit as the units stationed in STAAKEN is considered credible since STAAKEN was also occuded by ground attack units from COTTEUS. The 2d GA Div previously stationed in COTTEUS and FINSTERNALLE was apparently transferred to the DOEBERITZ, STAAKEN, and SCHOEMALDE airfields.
